

SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

Viewer 099 Session Report
Date: 28 Sep 88
Time: 1105 - 1148

Summary: Unlike 'L1' (a 'flawed end product'), L2 is perceived as possessing the characteristics of an 'upgraded' piece of equipment, as if the capability of something in the (AOL-Soviet) inventory had been 'enhanced' through a technical change--like new components/assemblies--perhaps to the point where the thing/system could even be employed in a new functional role. An 'electronic box' seems to be especially important in this regard.

Also, the gestalt of 'directionality' is somehow associated with this thing, but the idea must be explored further...

SECRET/NOFORN - SKEET CHANNELS ONLY
